

## Java Developer

ScreenScape has reinvented place-based media in the image of the Internet. We're opening up the world of digital signage to small businesses, not-for-profit organizations, civic institutions, content service providers and more. Whether you're interested in powering one screen or a network of thousands we offer opportunities for content sharing, collaboration and commerce that combines into one powerful marketing punch.

ScreenScape is a dynamic young startup that requires every one of its team members to wear multiple hats and possess a self-starter attitude. ScreenScape uses the Agile/Scrum project management methodology and developers are involved in all phases of the software development life cycle. ScreenScape is seeking a Java developer to assist in the development of its product.

### Responsibilities

- Requirements analysis.
- Provide input on level of effort.
- Application design and development.
- Unit testing, code review, and peer review.
- Technical documentation.
- Bug fixes and maintenance.

### Required Skills

- 5+ years web development.
- 3+ years Java.
- 2+ years database development.
- Strong knowledge of object oriented concepts.
- Strong work ethic and a team player.
- Strong written and oral communication skills.

## Desired Skills

- Experience developing Flash applications.
- Experience with ActionScript 3.0.
- Experience with Struts, Hibernate, and Spring.
- Experience with MySQL.
- Experience using Eclipse and Subversion.
- Experience with software-as-a-service.
- Experience with Agile techniques.

## About ScreenScape Networks

ScreenScape Networks offers an online solution that enables venue managers to create, edit, and maintain intelligent slide displays to power a single screen or to create a locally coordinated network of screen displays. Members of ScreenScape form a peer-to-peer network and collective of venues interconnecting to establish a shared resource and a marketplace for exchanging content and ad space. Thus ScreenScape is a conduit through which advertisers of any size, located anywhere, can identify and access local, nuanced screenscapes both directly through point-to-point relationships and en masse through value-added programs and services.

## About Prince Edward Island

Located in the Maritimes, on the East Coast, Prince Edward Island (PEI) is Canada's smallest province. Known for its warm waters and beautiful coastlines, PEI is a mecca for summer tourists in search of rest and relaxation, golf, great food and music.

The capital Charlottetown is known as the birthplace of Canada and, in recent years, has been developing as a center for bio-business and information technology. Cosmopolitan yet affordable, Charlottetown is the central hub of the Island, home to the University of Prince Edward Island, The Confederation Centre of the Arts, and a vibrant cultural community.
